

6.251/15.081 Homework 2
WEEK 3

Problems 2.3, 2.6, 2.9, 2.13, 2.22(b).

In problem 2.22(b), you may take the result of part (a) for granted. (Part (a) is hard to prove without using results from Section 2.8, which we are not covering.) The key to part (b) is to find which definition of corner is easiest to work with here.

If looking for a more challenging problem, try 2.19 (optional).
